Eiffage Genie Civil, Charter for Field Support Vessel (FSV) at Saint-Louis, Senegal

Eiffage Genie Civil is undertaking marine civils works in Senegal.

Eiffage Genie Civil contracted Project Management International (PMI) for the charter of our workboat *PMI Atlanta*.

Scope of Work

- Charter of PMI Atlanta for assistance with the offshore construction of the breakwater in rock.
- Assistance during the construction/installation of the caissons

Principal Dimensions

Principal dimensions of the PMI Atlanta are listed below:

LOA	=	11.5m
BEAM	=	4.87m
DRAFT	=	0.8m

PMI Resources on Site

- *PMI Atlanta* with 3 crew

Summary vessel specifications

The MV Atlanta is fully equipped to operate as a state of the art survey vessel. With a built in moonpool and an A-frame derrick crane at the stern, M/V Atlanta is suited to a wide variety of marine survey related work.

Furthermore, Atlanta is also suited to a number of other nearshore marine related operations including, diving platform, crew changes and metocean deployment. Two 370hp engines and a strong fendering system at the bow of the vessel make this vessel ideally suited for near shore works. There is a spacious air-conditioned cabin, which has been kitted out for survey operations.

Health & Safety

PMI comply and adhere to all applicable international, national and local regulations pertaining to health, safety and the environment.

Contract Execution

The contract was executed to the required standards requested by the Client.
